

CV

This page is for robots/ATS. Next page is for humans :)

Name: Evgeny Shchekochikhin

Location: Riga, Latvia

Phone: +37128488227

Email: evgenyshe+cv@gmail.com

Portfolio: <https://github.com/users/genych/projects/1/views/1>

Linkedin: <https://www.linkedin.com/in/evgeny-shchekochikhin-3084b6175/>

Languages: English — C1, Russian — C2, Latvian — A2

Education: Bachelor's degree in biotechnology, Tambov State Technical University, 2004

Primary skills: web, back-end development, debugging, testing, documentation, CI/CD, OOP, functional, microservices, databases, operations, maintenance, technical support, system design and recovery

Soft skills: communication, critical thinking, team support/mentoring, time management

Primary technologies:

- ☒ PHP (5/7/8) preferably with but not limited by Symfony framework, Doctrine ORM, PHPUnit, Xdebug, LAMP
- ☒ MySQL/MariaDB/PostgreSQL/SQLite
- ☒ Docker, git/svn, Linux
- ☒ Redis/memcached, ElasticSearch, RabbitMQ

Secondary technologies and skills: front-end development (javascript/typescript with or without VueJS, Angular, React); python, node.js, CSS, HTML

Experience: 6 years, middle/senior, software developer/engineer

Hello, World!

Who am I: I'm Evgeny (Eugen) Shchekochikhin, 41 y.o. from Latvia.

Also I'm an engineer/developer. Professionally for six years already, for fun since middle school. Introverted, rational, anarchy roots, father, simple man. I value honesty and quality.

What I can do: I can get the job done. As a standalone developer, as a team member, as an organizer. I prefer to work in a team. I'm able to communicate, listen and learn. I own my decisions and mistakes.

Speaking of tech, I'm good with programming itself and PHP in particular. Service Oriented Architecture, LAMP stack, OOP, MVC frameworks (mostly Symfony-based), event queues, patterns, all that jazz. I don't really like the front-end ecosystem but I have some experience with it (plain javascript/typescript, angular/vue/react, bundling...). I like HTML, though.

I'm always curious about other tools and technologies, so I'm ready to try them (node.js, rust, golang, back to python, C-family... you name it).

I'm ok with devops things (CI/CD, containerization, orchestration and Linux ecosystem in general).

My primary communication language at work is English nowadays (default for years). I speak Russian (native), I understand Latvian a little bit (but I don't feel confident with it).

What I want: To continue my "actual software engineer" quest, keep learning, keep making solid helpful products.

What I want from you: Human decency and quite ethical business. I want to work with people who care. Enough flexibility and freedom to actually keep work-life balance. Challenges and complexity. Salary from 2000€.

Cheers! Feel free to contact me

This page is my job history summary:

Date	Company	Experience
February 2023 — April 2023	SIA Breakpoint	<p>Software Developer</p> <p>Moderately loaded user-facing application. Back-end work (bugs, features, templating...)</p> <p>Tech stack: PHP8/Symfony, PostgreSQL, ElasticSearch, MongoDB, Redis, Docker, Github actions, a bit of js/ts</p> <p>Reason to quit: role mismatch, culture fit, overhiring?</p>
July 2016 — November 2022	SIA Dyninno (Dynatech)	<p>PHP Software Developer</p> <p>Maintaining/reimplementing/migrating performant internal legacy services (booking, financial, marketing); learning/helping/mentoring people; database/application architecture, internal and external APIs, CI/CD and build automation; a lot of debugging, troubleshooting, negotiating, optimisations.</p> <p>Technologies: PHP (from 5.6 to 8.1, LAMP, various framework/ORM combinations); Hacklang; javascript (raw, templated and VueJs), typescript (Angular/React front-end maintenance); MySQL/MariaDB, Memcached, RabbitMQ, Docker, Gitlab, Sentry, Grafana, ArgoCD, JIRA</p> <p>Reason to quit: career growth deadend</p>
...	Various jobs	Really. From construction to theatre stage lighting. Exploring the world.
